

Feedback Team 40

Build

The readme was straight forward, and easy to understand.

Legibility

The code was legible and understandable.

Implementation

The implementation was as good as it could be, given the circumstances.

Maintainability

There were no unit tests, and it seemed like the only way to test the software, was by comparing outputs, at least from what I understood.

Requirements

The project fulfills the requirements specified in the requirement's document.

Other

None.
